Not Prepared to Commit Himself on

a Future Financial Policy

TT ITH Jacob E. Bamberger, presi-

future policy of the company with ref-

erence to dividends will, positively, be

President Bamberger, who arrived

from New York during the afternoon,

when asked for an expression on his

own attitude, pleaded that he was on-

able to strike an intelligent one in that

he had been required to absent him-self from the properties for so long a time. It would be, of course, influenced

by conditions and he had arrived too late to inquire into these. Discussing the decline in its shares on the Eastern

market, President Bamberger said it was due entirely to apprehensions that

one appeared to be able to define. is going to do better by the producer in short time. Conditions generally in the

East are very dull and although money is plentiful and free, there is but little for investment. This is accounted for the presence of some vague apprehension—the nature of which, said he, no the impression in the East is that silver the property was accommand.

Mr. Bamberger, who was accompa-nied by Mrs. Bamberger on his journey, reports the condition of their son Joe.

who, it was feared, would be compelled

The contractors on the Galena shaft

at Bingham having abandoned their undertaking, it is now going down un-

der the direction of a mine foreman and is now at a depth of 185 feet, with

the first prospecting to begin at a point

sixty-five feet below the present bot-tom. It is not believed that the man-

agement will experience any difficulty opening up the channels of ore that were so productive above, and results are, accordingly, looked forward to with liveliest interest by the neighbors.

The usual heavy tonnage of gold, copper and silver-bearing ares continue to come from the stopes of the Centennial-Eureka, said Superintendent Allen, who came in from that Tintle bonanza

again yesterday morning, and while

he had no pronounced changes to report the condition as a whole is a most satis-

factory one. He reports the new hoist

at the Tetro in commission, and ap-parently doing its work up to require-

rancisco stock board were recorded as

Mining company, 300 at \$9.62% cents,

Mining Notes.

S. W. Eccles, traffic manager for the American Smelting and Refining com-pany, is scheduled to arrive from the gen-eral offices in New York on Sunday.

Karl Eliers of the American Smelting and Relining company came in from the Northwest yesterday morning, and is visiting with Superintendent Rhodes down at the Murray furnaces.

C. E. Gable, who has so successfully exploited the Golden Sunbeam out of Custer, Ida., leaves for Stateline tomorrow to Inquire into prospects that have been commended to him.

Samuel McIntyre, president and general manager of the Mammoth of Tintic, has returned from the West and leaves for camp again in a few days.

General Manager Kearns of the Silver King will leave for that benanza next week, where he will remain for some days the guest of his efficient assistant, Mr. Dally.

Arthur E. Snow, secretary of the Columbus Con., has gone to Alta to in-quire into conditions there.

Manager Czizek of the Lost Packer has gone to that idaho property again.

Secretary W. H. Farnsworth of the Star Con. expects its records to arrive from Springville today, when the auditing committee will begin the labors to which they were assigned at the recent meeting of shareholders.

J. E. Hendrickson, superintendent of the Lower Mammoth of Tintle, will arrive from camp tonight to confer with Presi-dent Simon Bamberger.

The South Swansea of Tintic has three carloads of silver and lead ore on the way to the American's furnaces.

Harris K. Masters, who has been visit-ing with Superintendent Nutting of the Bingham Con. smelter, characterizes it as one of the most efficient he has ever seen, and he grew up with the furnaces.

back in the general offices, the

News of Mine, of Prospect, of Furnace and of Mill.

BINGHAM CON. AND AMERICAN

Relations Between the Smelter Com panies Extend No Further Than the Reciprocal.

HILE the gossips have been inclined to construe them otherwise, the relations between the management of the Blugham Con, and that of the American, extend no further than the purely reciprocal, said President White of the former, and as long as the Bingham's furnaces are maintaining their present degree of effi-clency there appears to be no reason why the spirit of reciprocity should not

hover over them.

'For the copper ores we are receiving through American channels the Bingham Con. surrendering its lead product. We are certainly not desirous of adding lead blasts to our plant and I doubt if the American was eager to put up a copper plant with which to accommodate its customers when means with which to do so were provided by us. Plainly, it is a commercial proposition and the man who is labor-ing under the impression that our affiliations are any closer than indicated is laboring under a misapprobension." With the proceeds of the million-dol-

lar bond sale on which to draw, it is said that the Bingbam Con, will com-plete its payments on the control of Eagle & Blue Bell of Tintic and take over the shares that are now in escrow at the Descret National bank.

WASHOUTS AT BINGHAM WERE GENERAL

Not a road, rail or wagen was spared by the torrents by which Bingham was immersed, said Manager Johnson of the Boston Con, on his return from camp, and while the furnaces of the valley have not experienced the effect, at camp it has been most provoking. In the reopening of the outlets in which transportation is confined to wagons the county has shown, said Manager. Johnson, a willingness to help out, and traffic along them will have been restored in short time, while there was assurance when he left that the Copper Belt railway would reach all connections in a few hours. The Bingham division of the Rio Grande, which also suffered from the waters that tore down the canyon, has been as diligent as usual in repairing the roadbed, and conditions are rapidly recovering the normal at this hour.

LODGE AND OFFICES FOR BRITTANIA TALENT

Designs for the offices and lodge within which the attaches of the Britannia company, Vancouver, will find shelter while the storms along Britannia beach are howling themselves hoarse were submitted by Joseph Dederichs to Manager George H. Robinson yesterday morning, and, with his ap-proval, they will be forwarded to the superintendent of construction. The structure, an unpretentious but substantial one, is to be built on an emi-nence overlooking the sea and near the big concentrator, for which the com-pany's mechanical engineer, C. W. Mc-Meckin, and his staff are now preparing plans in this city. Everything at is to be rushed to completion as planned.

OVERLAND SITUATION IS UNCHANGED

In the negotiations looking to an early resumption at the properties of the Overland Mining company at Sunshine, there was no change whatever during the day, said counsel for the creditors. If the moneys with which to satisfy conditions are here, as promised on Tuesday next, said Mr. Hoppaugh, he as well as Judge Dey is ready to enter into a stipulation staying proceedings and permit those undertaking to re-claim the proposition to go ahead with the endeavor. What his clients are waiting on is the jingle of the moneys on the mahogany.

THE CASTRO GROUP COMES BACK HOME

Interests in whose favor a \$60,000 option on the Castro group at Ogden having failed to comply with its terms, the deeds that have been in escrow for sev-eral months were yesterday drawn down by the owner, Nicholas Castro. With the copper market sustaining a firm stand at least, Mr. Castro will probably resume work on the group himself the present season and extend the lower funnel to the work. the lower tunnel to the main ore bodies, while the placer, which has been productive of much gold, will be operated

DAY'S OFFERINGS TO WORLD OF WEALTH

In the ore and bullion market the day's settlements amounted to \$56,000, McCornick & Co. reporting them as they follow: American bullion, \$31,300, gold, silver, lead and copper ores, \$34,-

In the metal market silver ruled at 55% cents an ounce, lead at \$3.50 per hundred pounds and casting copper at 12% cents a pound.

AS TO WORTHLESS STOCKS.

Editor Tribune:-I wish space in your valuable paper to express my ap-preciation to Congressman Van Duzen of Nevada for the effort he is making to pass a bill in Congress to prevent the study in Congress to prevent the study unjust sale of worthless stock. The methods employed by the sharks of these Western States are nothing short of stealing, and, in fact, I believe it would be more honorable to put a sun in a men's feeto put a gun in a man's face and de- agents.

mand his money, than the methods employed by these thieves in the awful THE TRIBUNE NEWS STANDS MR. BAMBERGER ployed by these theves in this available over-capitalization of worthless mines or ground; for many of the so-called mines are nothing but worthless ground, without a particle of evidence of a mine or possibility of such.

Over-capitalizing mining property and sallies stock for form 1 cent to 5 cents.

selling stock for from 1 cent to 5 cents is a curse to the mining industry. This effort on the part of Congressman Van Duzen should call out opinions and sunport from every honorable mining man in the West, and especially of Utah, where so much of this evil practice is

going on.

I am a woman holding large mining interests in this State, and as such such wish my name to go on record that I earnestly commend Congressman Van Duzen for the wise and timely effort be is making, and hope that every com-pany and incorporation will be com-pelled to bring affidavit from at least three honorable men as to the valua-tion of such property before such incor-porations be filed. Respectfully, DR. A. W. FITZGERALD. Manti, Utah, May 6th.

LESSON IN SMELTING FROM OLD MEXICO

A smeiter operator in Mexico says: "Our ores carry one-half of 1 per cent copper, and consequently our matte is low in copper, but rich in gold, with some silver. We have found that onefourth of 1 per cent copper is sufficient to collect all the gold and silver, and this amount pays freight and treatment charges. In the furnaces hot blast is supplied by waste heat from the boilers and furnaces. About Iv per cent of pyrite is used in the charge. The amount of coke used varies with the quantity of pyrite used, and other variations in conditions. A monthly run showed that an average of 7 per cent coke was employed. Coke is freighted sixty miles and costs \$20 gold per ton. There is little flue dust. The ores are dumped directly into the furnace as they come from the mine, breaking up the largest lumps only. No extra lime or other flux is required, the ores being self-fluxing when sultably mixed. The this amount pays freight and treatment self-fluxing when suitably mixed. The slags are very clean and carry from 40 to 45 per cent of ellica and insoluble mineral, iron 25 to 20 per cent and lime 3 to 5 per cent, but no lime is necessary. A silicate of iron slag is considered good enough, and so is iron matte, wh runs 55 to 56 per cent iron and £7 cent sulphur. The losses in are small, and the labor at the

NEW YORK'S CALL FOR MORE MONEY

While the proceeds of the last assessment have not been entirely exhausted, the equipment of the New York Bonan-za of Park City with means with which to handle the increased flood of water has made it necessary to call for an-other contribution from the sharehol-ders, and a 3-cent assessment was ac-cordingly levied by the directors yesterday afternoon, the same to become de-linquent June 7. President Wilson says he feels that this is the last he will be required to call for, as work on the contact is progressing with most favor-able results and in ore that is quite satisfactory. His search, however, is for the main body.

THE RICH ORE CHUTE IN THE ORA GROUP

D. M. Harvey, now managing the inerest of the owner in the Ora group of claims out of Reno. Nev., enjoys the distinction of being the first and only person who has met with results in the operating of the property, says the Reno Gazette. His success may be safely attributed to the twenty-seven the equipment of the big undertaking ing nearly every branch of the business, from prospecting to mine mana-ger. The speedy attainment of results indicates Mr. Harvey having rare knowledge of ore deposits. He certainly did not stumble on the rich ore chute now being developed by George Nichols and himself. The confidence reposed in Mr. Harvey is apt to make Mr. Nichols a tidy fortune.

GONE TO EUROPE WITH HIS SLIMES PROCESS

Advices from New York tell of the de-parture of George Moore, inventor of the slimes method which bears his name for Europe, he having been sum-moned to that country by a syndicate which is seeking the right to exploit his process there. Mr. Moore will re-turn to Salt Lake about the middle of Meanwhile the machines improvised by him are doing the business at the Con. Mercur.

HARTWIG COHEN BACK IN CALIFORNIA

A message from the west announces the arrival of Hartwig A. Cohen from Alaska, and his departure for Johannesburg, Cal., where he is conducting an examination of mining property for clients in the East. It is understood that Mr. Cohen will come to this State in a short time to inquire into opera-tions at the Utah Copper company's mines and mill at Bingham, in which he retains an interest.

Production of Copper. There are ten electrolytic copper refineries in the United States; Great Britain, 6; Germany, 9; France, 4; Aus-tria-Hungary, 2; Russia, 2; total, 33. tria-Hungary, 2; Russia, 2; total, 33. The world's average daily production of electrolytic copper is about 883 short tons, of which 764 tons, or 86.5 per cent is supplied by the United States. Of the remaining 119 tons daily production, or approximately 13.5 per cent, Great Britain furnishes 8.5 per cent, Germany 2.5 per cent, and France 1.5 per cent. The United States now produces annually 250,000 tons of electrolytic copper, which, at \$250 per ton, is valued at per, which, at \$250 per ton, is valued at \$70,000,000. The by-product recovered daily contains about 740,000 ounces silver and 950 ounces gold, which equals an annual output of 27,000,000 ounces of silver, valued at \$14,000,000, and 250,000 ounces of gold, valued at \$5,167,500.

LOCAL MARKET IN

IMPROVED FORM

For 12,500 shares of stock with which the shopkeepers were induced to part at yesterday's calls on the mining exchange the investor was required to check out \$10,-Grand Central, with the regular dividend of \$25,000 to be posted in a few days, was again much in evidence, with
the customer bagging all in sight up to
\$4.75, while Dally West moved up to \$22.25,
with buyers' options on Montana of Tonopah bringing \$1.00, the shorts placing it
down to \$1.57\text{\text{\text{options}}}\$. Century was traded in
around \$15 cents, while Bwansea of Tintic
came out to a bid of \$50 cents, with Star
Con. going over the board at \$14 cents.
New York was firm and in good demand,
notwithstanding the invitation to shareholders to come forward with another assessment, while May Day was quite heavily dealt in up to \$5\tau\$ cents, with Tetro
stationary at \$20 cents, the day closing on
the following market:

A M P M days, was again much in evidence, with A. M. P. M.

Consultation Free. in all private diseases of men, to show our good faith and skill, we are always willing to wait for our fee until a cure is effected.

WEAK MEN

Be sure your cure is thorough. Not one of our patients has ever had a relimps after being discharged as cured, and we oure in less time than the or-dinary forms of treat-ment require. So called "Weakness" in men is merely a symptom of chronic indiamnation in the presisting gland, brought on by early disapation or by the improper treatment of some contracted disease. A complete and radical cure is, therefore, a question of restoring the pressate gland to its normal state, and this we accomplish promptly and completely without the use of internal remedies. Our treatment is a local one entirely. It is original and scientific, and has been proven absolutely effective by thousands of tests. We are convinced that by no other methods can full and permanent restoration of strength and vigor be accomplished. Specific Blood Polson. No dangerous minerals to drive the virus to the interior, but harm-less blood-deanning remedies, that remove the tast polsonous taint.

VARICOCELE Absolutely paintent treatment that care completely. Investi-gate our method it is the only thoroughly scientific treatment for this disease being ex-ployed.

Sperma torrhoea, Gonorrhoea, Srphi-lis, Stricture, Pilea, Lost Manhood, Hy-drocele, Se mina; Weakness, etc., are also among the di-sonaca we cure in stay cured.
